# Installation instructions

1. Prepare screws and fixing buckles.

2. Adjust the fixing buckle to a suitable position and use a screwdriver to drive in the screw to fix it.

3. Put the light-emitting surface of the lamp body upward, and gently insert the lamp bar into the fixing buckle.

4. The lamp body is completely embedded in the fixing buckle to complete the installation.

## NOTE

The PCB board in the casing is **side-mounted** and can only be bent from the **side**.

Please do not twist the light bar to avoid damage to the light bar.

# CUTTING&RECONNECTION

It's feasible to cut along the black point at the side of led strip. Do not cut optionally to avoid damage to led strip

Cut the the led strip at the black cut mark

Finished Cutting

Coat section with glue uniformly after cutting

Insert the section into the end-cap according to the direction of arrow

Dry the end-cap with hot wind to make the installation is firm
